Professional Summary

Accomplished **Full Stack .NET Developer** with **8+ years** of experience in building high-performance, scalable web applications. Adept at developing robust backend solutions, optimizing front-end experiences, and driving cloud-based innovations. Skilled in **.NET Core, Angular, React.js, Microservices, and Cloud Technologies (Azure)**. Proven ability to streamline workflows, enhance system performance, and collaborate effectively with cross-functional teams to deliver enterprise-grade solutions.

Work Experience

[Smart Cube](#), Dubai, Egypt — Senior Full Stack .NET Developer

2022 - Present (Remote)

- I have worked on several large-scale and complex projects using microservices architecture, which significantly enhanced my understanding of system architecture and how to manage enterprise-level applications effectively.
- One of the key projects I contributed to was [eventtix](#), a comprehensive event booking platform designed to handle high traffic and dynamic business workflows
- Currently, I'm working on a major project called Jarvis, a large-scale government service platform involving more than five cross-functional teams. This project has further deepened my expertise in collaboration, scalability, and system integration within enterprise environments.

[Newtec](#), Qatar, Egypt — Senior Full Stack .NET Developer

2021 - 2022 (Remote)

- Contributed to internal software projects for various government ministries and institutions.
- Led the design, development, and debugging of SharePoint-based solutions for key clients, including [QPost](#), [MOC](#), ARBT, and QSteel.
- Successfully managed SharePoint projects (both Online and On-Premise).

[Mersvo Media](#), London, Egypt, Saudi Arabia — Full Stack .NET Developer

2020 - 2021 (Remote)

- Participated in projects for various government ministries, working closely with end-users, stakeholders, and project managers to ensure alignment with business needs.
- Upgraded and optimized existing software applications.

2017 - 2020 (onSite)

- I started my journey as the first .NET developer in the team and gradually built and led a development team for 3 years. During this period, I worked on a wide range of small to medium-sized applications and websites, taking part in the full development lifecycle. I gained strong experience with technologies such as ASP.NET Core, MVC, and Angular.
- To view some of the projects I've worked on, feel free to visit my portfolio:

[Nitcotek](#), Mansoura – Full Stack .NET Developer

2016 - 2017 (onSite)

- Started my career at [Nitcotek](#) as a Junior Developer during my final year at university, where I worked on several internal projects, including ERP systems such as Fcare, eCare, and HR platforms. During this time, I gained strong experience in large-scale systems development, working extensively with SQL databases, ASP.NET, and handling client pressure, system bugs, and real-time issues. This period helped me build a solid technical foundation and problem-solving mindset.

Technical Skills

- **Languages:** C# ,JavaScript ,Learn Python
- **Frameworks:** ASP.NET MVC 5, ASP.NET Core 3.1+, .NET 5+, Angular +2, React JS,APB
- **Web Technologies:** HTML5, CSS3, Bootstrap, jQuery, AJAX, REST APIs, GraphQL, gRPC
